### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Response to RCE*

This Office Action is in response to applicant's RCE filed on September 15, 2006.

Claims 1-3, 16, and 17 are pending.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hossainy et al (U.S. Patent No. 6,713,119) in view of Rowan et al (U.S. Patent No. 6,872,225). Hossainy et al discloses a composition with sufficient therapeutic substance applied onto the surface of a prosthesis. Hossainy discloses the prosthesis can be further increased by applying a plurality of coating layers onto the prosthesis, such as a second coat that is water soluble such as heparin (column 9 lines 28-67 thru column 10 lines 1-15). The Hossainy does not teach the prosthesis comprising a therapeutic rapamycin layer. Rowan et al discloses stents medical device comprising a coating comprising a polymer matrix is swollen with a pharmaceutical solution whereby pharmaceutical active compound is imbibed into the polymer matrix. Rowan et al further discloses the pharmaceutical actives include rapamycin (column 16 lines 49-51). Therefore it would have been obvious to one skilled in the art to utilize the Rowan et al's stent

device and then applying a second coat with water soluble as taught by Hossainy et al as rapamycin such would inhibit the proliferation of vascular smooth muscle cells in vivo.

***Allowable Subject Matter***

Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
